FULL STACK DEVELOPER

Full-Stack Developer skilled in React, Next.js, TypeScript, Node.js, and MongoDB. Experienced in building responsive web applications, REST APIs, authentication systems, and AI-integrated projects. Solved 250+ DSA problems and passionate about scalable, user-focused applications.

TECHNICAL SKILLS

Languages	: TypeScript, JavaScript, Python, C++
Frontend Tech.	: HTML5, CSS3, TailwindCSS, React.js
Backend Tech.	: Node.js, Express.js, Next.js, JWT, NextAuth
Databases	: MySQL, MongoDB
Dev Tools	: Visual Studio Code, Git, Github, Postman, Docker
Core Concepts	: Data Structures and Algorithms, OOPs, Operating System, DBMS, REST APIs

EDUCATION

Kendriya Vidyalaya, Bhopal <i>12th Standard</i>	April 2011 – April 2023 84.6%
VIT Bhopal University, Bhopal <i>Bachelor of Technology in Computer Science</i>	August 2023 – Present 8.5 CGPA

PROJECTS

MysteryMessage - Message APP	<i>Next.js • NextAuth • TailwindCSS • Shadcn</i>	Source Code
- Developed a full-stack anonymous messaging app using Next.js with SSR and modern routing. - Implemented secure authentication and session management using NextAuth with protected routes. - Designed a responsive UI using Tailwind CSS and Shadcn UI for consistent UX. - Built REST APIs for message creation, retrieval, and deletion with validation and error handling. - Enhanced security through token management and efficient session handling.		
MindScribe - A NoteTaking Webapp	<i>React.js • TailwindCSS</i>	Source Code
- Developed a contemporary note-taking program that allows users to add, edit, and remove notes in real-time. - Used a responsive layout with Tailwind CSS and developed interactive components using React. - Provided smooth state management and immediate response to user actions without reloading the page. - Focused on providing a clutter-free, distraction-free interface optimized for productivity and user convenience.		
BargainBuddy - A Price Comparing ChatBot	<i>React.js • CSS • GeminiAPI</i>	Source Code
- Built a chat interface comparing prices of products across various sources with the Gemini API. - Allowed users to enter product names and be given the best price as well as other alternatives. - Built a user-friendly chat-like interface making it easier to search for products and make informed shopping choices. - Shown consumption of API, data processing, and efficient display of comparative results within a conversational sequence.		

ACHIEVEMENTS

- Data Structure and Algorithms : Solved 250+ Problems.
- Contest Rating : LeetCode1488, GeeksForGeeks (1593)
