FULL STACK DEVELOPER

Full-Stack Developer with hands-on experience in building responsive, scalable web applications using React, JavaScript, Tailwind CSS, Node.js, Express, and MongoDB. Strong foundation in data structures, algorithms, DBMS, and OOP concepts, with 250+ DSA problems solved. Experienced in API integration, state management, authentication, and RESTful services, seeking opportunities to contribute as a Frontend / Full-Stack Developer or Software Engineer Intern.

TECHNICAL SKILLS

Languages : TypeScript, JavaScript, Python, C++
Frontend Tech. : HTML5, CSS3, TailwindCSS, React.js
Backend Tech. : Node.js, Express.js, Next.js, JWT, NextAuth
Databases : MySQL, MongoDB
Dev Tools : Visual Studio Code, Git, Github, Postman
Core Concepts : Data Structures and Algorithms, OOPs , Operating System, DBMS, REST APIs

EDUCATION

Kendriya Vidyalaya, Bhopal 12th Standard	April 2011 – April 2023 84.6%
VIT Bhopal University, Bhopal Bachelor of Technology in Computer Science	August 2023 – Present 8.5 CGPA

PROJECTS

MysteryMessage - Message APP	<i>Next.js, NextAuth, TailwindCSS, Shadcn</i>	Source Code
- Developed a full-stack anonymous messaging application using Next.js with server-side rendering and modern routing. - Implemented secure user authentication and session management using NextAuth, supporting protected routes and role-based access. - Designed a clean, responsive user interface using Tailwind CSS and Shadcn UI components for consistent UX across devices. - Built RESTful API routes to handle message creation, retrieval, and deletion with proper validation and error handling. - Ensured application security by managing authentication tokens, preventing unauthorized access, and handling user sessions efficiently.		
MindScribe - A NoteTaking Webapp	<i>React.js, TailwindCSS</i>	Source Code
- Developed a contemporary note-taking program that allows users to add, edit, and remove notes in real-time. - Used a responsive layout with Tailwind CSS and developed interactive components using React. - Provided smooth state management and immediate response to user actions without reloading the page. - Focused on providing a clutter-free, distraction-free interface optimized for productivity and user convenience.		
BargainBuddy - A Price Compaing ChatBot	<i>React.js, CSS, GeminiAPI</i>	Source Code
- Built a chat interface comparing prices of products across various sources with the Gemini API. - Allowed users to enter product names and be given the best price as well as other alternatives. - Built a user-friendly chat-like interface making it easier to search for products and make informed shopping choices. - Shown consumption of API, data processing, and efficient display of comparative results within a conversational sequence.		

ACHIEVEMENTS

- Data Structure and Algorithms : Solved 250+ Problems.
- Contest Rating : LeetCode1488, GeeksForGeeks (1593)
