FULL STACK DEVELOPER

I'm Harsh Kushwaha, a third-year B.Tech Computer Science student at VIT Bhopal University with a strong passion for full-stack web development. I've built responsive and modern user interfaces using React, TypeScript, Tailwind CSS, JavaScript, HTML, and CSS. I also have solid programming skills in Python, C++, and JavaScript that support my problem-solving abilities. Having completed my frontend journey, I'm now focused on mastering backend technologies to become a proficient full-stack developer.

TECHNICAL SKILLS

Languages	: JavaScript, Python, C++
Web Tech.	: HTML, CSS, TailwindCSS, React.js, Node.js, Express, JWT
Databases	: MySQL, MongoDB
Dev Tools	: Visual Studio Code, Git, Github, Postman
Core Concepts	: OOPs , Operating System, DBMS

EDUCATION

Kendriya Vidyalaya, Bhopal <i>12th Standard</i>	April 2011 – April 2023 84.6%
VIT Bhopal University, Bhopal <i>Bachelor of Science in Computer Science</i>	August 2023 – Present 8.5 CGPA

PROJECTS

WeatherClue - Weather APP	<i>HTML,CSS,Javascript,API</i>	Source Code
- Created a responsive web application that shows live weather information for more than 200,000 cities using the OpenWeather API. - Implemented search functionality to retrieve weather information such as temperature, humidity, and wind speed according to user input. - Developed a simple and intuitive UI using plain HTML, CSS, and JavaScript to provide a seamless experience across all devices. - Showcased excellent API integration, DOM manipulation, and asynchronous JavaScript (fetch, promises) skills.		
MindScribe - A NoteTaking Webapp	<i>React.js,TailwindCSS</i>	Source Code
- Developed a contemporary note-taking program that allows users to add, edit, and remove notes in real-time. - Used a responsive layout with Tailwind CSS and developed interactive components using React. - Provided smooth state management and immediate response to user actions without reloading the page. - Focused on providing a clutter-free, distraction-free interface optimized for productivity and user convenience.		
BargainBuddy - A Price Compaing ChatBot	<i>React.js,CSS,GeminiAPI</i>	Source Code
- Built a chat interface comparing prices of products across various sources with the Gemini API. - Allowed users to enter product names and be given the best price as well as other alternatives. - Built a user-friendly chat-like interface making it easier to search for products and make informed shopping choices. - Shown consumption of API, data processing, and efficient display of comparative results within a conversational sequence.		

ACHIEVEMENTS

- Data Structure and Algorithms : Solved 250+ Problems.
- Contest Rating : LeetCode1488, GeeksForGeeks (1593)
